Banded Procedures in Bariatric Surgery

Indications, techniques
and clinical results

Advanced Training Course
May 26th - 27th, 2020

Center for Obesity and Metabolic Surgery
Department of General- und Visceral Surgery
Medical Center - University of Freiburg

Invitation

Dear Colleagues,

Welcome to this hands-on, blended learning expert course on banded procedures! Conventional roux-en-y gastric bypass surgery and sleeve gastrectomy are internationally recognized bariatric and metabolic procedures. This course focuses on additional ring implantation in these operations. The course syllabus entails knowledge transfer regarding most recent data on primary banded procedures and their indications as well as revisional surgery for weight regain and dumping. It will also provide thorough instruction regarding surgical technique.

Day one will comprise a comprehensive theoretical program including lectures and live OR transmission of banded procedures.

The second day will be dedicated to hands-on training. Participants will have the opportunity to implement and practice theoretical knowledge in the wet-lab facilities of the IRCAD Institute. All hands-on sessions will be accompanied by experienced and trained surgeons.

Previous clinical experience in bariatric/metabolic surgery is mandatory to attend the course.

We cordially invite you to this blended learning course on banded procedures.

Yours

Prof. Dr. med.
Stefan Fichtner-Feigl
Medical Director

Prof. Dr. med.
Goran Marjanovic
Scientific Director
